ANTI SEIZE COMPOUND, 5170, 5171, 5154

Anti-Seize Compound to provide long-term protection against galling, corrosion, rust and seizure. Ingredients include lamellar aluminium particles and microscopically fine talc and graphite. Applications: bolts, nuts and other threaded connections in difficult conditions and temperatures in applications where components must be dismantled. The product is especially recommended for destinations that should not be exposed to copper or lead. Resistant to water and steam as well as most acids and alkalis. Temperature range: below +1100 °C.
