CHAIN LUBRICANT, 3050

Additivated mineral-based oil, which lubricates chains and cables efficiently thanks to a good penetration and prolongs their service life by many times. Does not splash and stays well in its application object. Penetrates to the core of cables and lubricates the innermost parts of them, which are subject to the most stress. For variable conditions (from -30 °C to +110 °C). Insoluble in water.
