HIGH PRESSURE GENERAL PURPOSE GREASE, 5200

Mineral oil-based, high pressure-resistant (EP) grease, which has excellent high temperature properties. The product combines the latest technology with free from heavy metals, extreme pressure resistant additives and advanced lithium complex precipitant, which has excellent resistance to water and corrosion. Resistant to most acids and alkalis. Excellent stability at different temperatures and ashless components. High stress resistance. Exceeds DAFin GX specification and Ford SAM 1C 9111A specification. Operating temperature range from -20 °C to +200 °C. Use for the reduction of friction in slide bearings, which face high pressure loads and high temperature. Can be used with low or high engine speeds.
