AT-1200 CALCIUM LF, 3722

Calcium-based grease for lubrication points exposed to water. High-pressurised (EP), also suitable for heavy-duty use. Properties: NLGI class (stiffness): 2-3, penetration: +25 ?C, 0.1 mm: 270, colour: dark red, toughened, precipitant: calcium soap, the basic oil: mineral oil, paraffinic, base oil viscosity: 110 cSt, +40 ?C, dropping point: +160 ?C, four-ball test: 320 kg, operating temperature: from -20 ?C to +130 ?C, DIN-KP2K-20 and ISO-LXBCHB2 Suitable for the grease lubrication of chassis lubrication points of agricultural and forestry machinery, excavation machinery, transport equipment, as well as ball, roller and plain bearings. NB! Due to its toughness, the grease is not suitable for bearings that are at high revs.
