AT-3000 SYNTHETIC SPRAY VASELINE, 3710

Synthetic, firmly contagious, equipped with MOX organometallic complex additive versatile lubricant made specifically for wet operating environments. Adheres to the raw surface firmly and forms a lubrication which is very resistant to cold, hot and salt water. Reliable lubricating and sliding effect as well as excellent corrosion protection, which is resistant to all conventional cleaning agents. Operating temperature from -40°C to +220°C. Neutral to O-lubes. Stays firmly in its object, does not drip away. Very good abrasion resistance.
