

Brake Grease

AT Brake Grease
Metal-free, protects against corrosion.

Properties:

- **soft and plastic**
- **long-term stability ensuring extended service life and reduced costs**
- **excellent load-bearing capacity**
- **relatively good compatibility with many commonly used sealing materials**
- **exceptional water resistance**
- **good adhesion**
- **acid-free**
- **outstanding resistance to oxidation**

Applications:

- **guide pins, brake shafts and brake pad supports in braking systems**
- **backing plates of disc brake pads**
- **braking systems in rail transport**

Technical Data:

- **colour: brown**
- **base oil: mineral oil**
- **classification: K2K-30**
- **consistency (NLGI grade): 2**
- **density (15 °C, kg/m³): 950**
- **temperature range (°C): -30 to +240**
- **dropping point (°C): not specified**
- **service life (02-A/1500/6000-120, h): >130**
- **water resistance (static): Level 0-90**
- **corrosion protection (Emcor, distilled water): Level 0**
