

## COPPER PASTE SPRAY, 5150, 5152, 5153

*Non drippy, insoluble in water, assembly paste protecting against high and low temperatures seizures. Ensures protection even under extreme conditions. Copper paste consists of micro-sized copper particles that are in the synthetic lubricant, which has non-melting Bentonite grease base. Ensures the fast and easy opening of threads and seals, even if parts would have been exposed to high temperatures or corrosive conditions for a long period. Lead-free, contains no sulphur. Operating temperature range: below +1100°C.*
