

DEODORISER FOR CAR AIR-CONDITIONING, 7120

Developed specifically for removing and preventing interior vehicle odours. Odours caused by air-conditioning will be removed simply and in a short period of time. Easy to use: Shake well before use, set the can on the floor, start the engine, select recirculated ventilation at average power, open the air vents, activate the can, close the windows and doors, use for 10 to 15 minutes. When the can is empty, let the car be vented for 5 to 10 minutes with the car running at full ventilation and with the doors and windows open. The product works best in a warm car.
