METAL-FREE ASSEMBLY PASTE, 5172, 5173

Metal-free, white, assembly paste of high standards preventing seizure. Prevents weld sticking and burning seizure to up to +1400 °C. Class of its own in applications where metal, dark assembly pastes can not be used. Resistant to hot and cold water, oils, petrol and most acids and alkalis. Cannot be scratched, burnt or washed away. Works also as a sealing material for offset flanges and flat seal roughness. Capable of more precise torques. Facilitates removal of hot screws and keeping them reusable. Low coefficient of friction, and very good anti-oxidant properties. Does not contain copper, nickel, lead, sulphur, halogens or silicone oil.
