MOS² RUST REMOVING OIL

Rust remover, lubricant and penetrating oil in one product. Frees rusted pieces from each other and prevents parts from re-sticking. Use of MOS as an additive gives the product a wider than normal area of application. Very low friction characteristics. Usable in a wide temperature range (-30 °C to +450 °C) Excellent lubrication characteristics, even at high pressures. It effectively protects against rust and stops corrosion that has already started. Very low conductivity. The product is silicone-free and stable in air and oxygen conditions.
