MULTI MOUNTING PASTE, 3354

Multi-purpose high-temperature assembly paste for demanding applications with ceramic background. Suitable for use as a lubricant, separating and anti-corrosion agent. High pressure resistant, very good corrosion protection, resistant to spray and salt spray, dilute acids and bases. To avoid brake and squeak noise. Metal-free – no adverse effect on braking devices, such as sensors. The bottle contains a handy brush nozzle to aid with application of the product. Temperature resistance from -40?C to +1500?C. Suitable for all the moving parts in the vehicle brake system, including ABS brakes, ASR and ESP-systems. As an installation aid in machines, as well as to avoid damage and wear in bearings, sliding objects, screw and socket joints during breaking-in. Also, for other lubricant works at high pressures and temperatures.
